20	NSFR ratio	226.5%	221.1%	227.2%	219.2%	211.1%

⁽¹⁾ Capitec Bank Holdings Limited formally transitioned to IFRS 9 on 1 March 2018 and by 1 March 2021 fully phased in IFRS 9.

⁽²⁾ As Capitec has a net cash inflow after applying the run-off factors, outflows for the purpose of the ratio are deemed to be 25% of gross outflows.

⁽³⁾ The Prudential Authority issued Directive 4 of 2020 on 27 August 2020. Directive 4 of 2020 has replaced Directive 6 of 2016 and requires banks to publicly disclose their Domestic Systemically Important Bank ("D-SIB") capital add-on as part of the composition of regulatory capital disclosure.

⁽⁴⁾ The new regulations relating to the capital requirements for banks' equity investments in funds became effective on 1 January 2021. In terms of the new regulations, banks are allowed to adopt a look-through approach to calculate the risk weighted asset exposures for equity investments in funds. Capitec invests in money market unit trust ("MMUT") investment funds, which are included in the scope of the new regulations. The underlying assets of MMUT investment funds are typically invested in a composition of Government Bonds, Treasury Bills and interest bearing deposits with banks. Up until 31 December 2020, the investments in these MMUT's were classified as corporate investments and included under credit risk, which were risk weighted at a 100% risk weight. From 1 January 2021, these investments were classified as equity investments in funds and now included under investment risk. Capitec adopted the look-through approach as outlined in the new regulations to calculate the risk weighted exposures of these investments from 1 January 2021.
